Title and Location of Project	Design Completion Year	Construction Completion Year	Project Owner	Project Original Budget (or not to exceed amount)	Total Cost of the Project	Brief Description of Project
91st Avenue WWTP Projects, Phoenix, AZ	2005	2010	City of Phoenix, AZ	\$150M	\$150M	<p>Arcadis, in collaboration with subconsultants, provided program management, design, construction administration, and resident engineering services for the expansion of the 91st Avenue WWTP to a revolutionary concept plant. Arcadis master planned the Unified Plant, a wastewater treatment facility with a build-out capacity of 385 mgd, to be expanded in modular sections.</p> <p>The UP05 Expansion Program included two projects: the \$45 million Project A, which involved construction of the first half of a 385-mgd average daily flow pump station for discharge of plant effluent to the Tres Rios Wetlands; and the \$105 million Project B, which expanded the liquid stream treatment facilities by approximately 38.5 mgd. Arcadis served as the assistant program manager for the entire \$150 million program and was responsible for the management and delivery of the design and construction administration/ resident engineering services for Project B.</p> <p>A hallmark of these construction projects was the delivery of the projects under the Construction Manager at Risk (CM@Risk) contracting approach. Drawing on lessons learned from past projects, we provided delivery process expertise for the program team. As part of this role, we developed the majority of the scoping documents for the program related to contractor, owner, and engineer coordination, and we led the development of the construction phase coordination plans that ultimately were implemented by both project teams (engineer and contractor).</p> <p>Design and construction efficiency improvements developed through the collaboration of the engineer, owner, and contractor on this project yielded approximately \$5 million in savings</p>
