In May 2012, Dominion was requested to perform an asbestos inspection and lead inspection and produce a work plan for the abatement activities. Dominion was also contracted to perform oversight of the asbestos-contaminated dust clean-up procedures. The clean-up project was performed in June 2012 through July 2012. The abatement activities were completed in a timely manner with final clearance air sampling. The final invoice to the client was \$21,269.

c. PROJECT OWNER Phoenix Elementary School District	d. DOLLAR AMOUNT OF PROJECT \$8,000	e. TOTAL COST OF PROJECT \$7,718
---	--	-------------------------------------

f. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and length of project)

In May 2012, Dominion was requested to perform limited pesticide soil sampling in the crawl spaces beneath buildings that were scheduled to undergo a major renovation. The soil sample results indicated that the pesticide chemicals Aldrin, Chlordane, and Dieldrin were found to be above the soil remediation levels. As a result, Dominion conducted air monitoring in and above the crawl space to determine the proper level of personal protective equipment that would be required by any personnel conducting work inside the crawl space. Based on the results of the air monitoring, Dominion designed a project protocol allowed the work to go forward under controlled guidelines. Dominion's estimated project cost was \$8,000. The final invoice to the client was \$7,718.60.

In addition, Dominion responded to a massive raw sewage leak into an Elementary School during the school's summer vacation, on July 15, 2010. The elementary school was scheduled to re-convene on August 12, 2010. The Phoenix Elementary School District informed Dominion that there was no space available at other District schools to temporarily accept any displaced students. Therefore, it was imperative that the remediation activities be conducted on an emergency basis. The sewage contamination affected approximately 30,000 square feet of the school. Dominion was asked to design the remediation plan, assist in obtaining qualified contractors, perform project oversight, perform post remediation sampling, complete closeout documentation and perform oversight for the restoration activities. Dominion is proud to say with the help of approximately eighty-five people working day and night shifts the school was opened on schedule, on August 12, 2010. The pre-project estimate for Dominion's services was approximately \$69,000. The final amount billed to the client was approximately \$62,000.

23. PROJECT OWNER'S INFORMATION

c. PROJECT OWNER	d. DOLLAR AMOUNT OF PROJECT	e. TOTAL COST OF PROJECT
Arizona School Facilities Board	\$11,500	\$10,970

f. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and length of project)

In July 2012, Dominion was requested to perform limited fungal ambient air investigation and surface sampling of the HVAC systems at the Camp Verde Middle and High School. Based on the laboratory analytical results for the air samples, no airborne fungi related indoor air quality problem was identified at the time and location of the sampling. However, based on the laboratory analytical results for the surface samples, fungal growth was identified inside the HVAC system in numerous locations. Based on the findings of the fungal investigation, Dominion recommended that the HVAC system at the Camp Verde Middle and High Schools be cleaned and that the contractor hired to do the work follow the National Air Duct Cleaners Association General Specifications for the Cleaning of Commercial Heating, Ventilating and Air Conditioning Systems. Dominion's estimated project cost was \$10,970 and the project was completed within budget.

23. PROJECT OWNER'S INFORMATION

c. PROJECT OWNER Dysart Unified School District	d. DOLLAR AMOUNT OF PROJECT \$44,355	e. TOTAL COST OF PROJECT \$44,355
---	---	--

f. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and length of project)

In August 2011, Dominion was requested to perform an initial AHERA asbestos inspection and produce an AHERA management plan for all of the new schools that had been constructed within recent years along with older school buildings throughout the Dysart Unified School District. In addition, Dominion was also requested to perform the three year re-inspections of the schools that had been previously inspected but now require the re-inspection in order to stay in compliance with AHERA. The project included a total of twenty-four schools requiring initial or re-inspection and management plans. Dominion was able to complete the inspections and management plans for all twenty-four schools by April 2012. Dominion's estimated project cost was \$44,355 and the final invoice to the client was \$44,355.

In 2010, Dominion received a call from Dysart School District regarding several teachers at a Dysart School that had been complaining of headaches and nausea. Dominion was asked to perform an investigation and determine if the symptoms were related to the school environment. Dominion's Industrial Hygienist and Toxicologist conducted an indoor air quality investigation at the school. As a result of their expertise and with the use of Dominion's in-house testing equipment, it was determined that the school had a Freon leak in one of the HVAC units servicing the central core of the building. The exact HVAC unit was identified and an HVAC company was retained to repair the leak. Confirmation air sampling determined that the indoor air was now void of Freon 22 and the repairs were successful. Dominion's estimated project cost was \$2,500 for environmental services and the actual cost was \$2,500.

6. ADDITIONAL INFORMATION

- a. **PROVIDE ANY ADDITIONAL INFORMATION YOU FEEL MAY BE NECESSARY TO DESCRIBE YOUR FIRMS QUALIFICATIONS. (ATTACH ADDITIONAL SHEETS AS NEEDED.)**
- **Dominion is a twenty-five year old, full service, professional environmental consulting firm that provides a multifaceted array of services in environmental management and regulatory compliance. Dominion specializes in services to assess, manage, design, and resolve environmental health, safety, and regulatory compliance issues.**
 - **Founded in 1989 by the President, Mr. Vern Crow, Dominion operates with a team that consists of twenty-five full-time staff members. The Corporate office is located in North Central Phoenix and operates as the central hub for all environmental programs. Dominion also maintains one full time consulting office in California and one in Nevada.**
 - **The firm maintains insurance policies with a minimum five million dollar limit that can be adjusted to meet or exceed the coverage requirements for any of our Clients. Dominion has a “claim free” insurance record, due to Dominion’s strict ongoing quality assurance/quality control program (QA/QC) and the high standard of performance demanded of its employees.**
 - **Dominion is aware of the importance for data confidentiality and respects the fact that our clients expect a high standard of integrity from a consultant. Dominion’s Client Data Confidentiality Policy guarantees that all information obtained in the performance of each project is considered proprietary information belonging to that client and cannot be used for any other purpose without prior written consent by the client. Having this policy in place also helps to prevent potential conflicts of interest. Dominion does not accept business that may constitute a conflict of interest and routinely signs confidential Non-disclosure Agreements with clients.**
 - **Committed to the highest level of professionalism, Dominion gives careful consideration to the design and implementation of all environmental projects. Whether managing one large complex environmental project, groups of multiple sites with similar environmental issues, or conducting residential and commercial indoor air quality investigations, Dominion applies solid science and years of professional expertise to each environmental challenge. Dominion’s reputation in the consulting business has been created and cultivated over the years through hard work, good communication, and professional expertise. Dominion is dedicated to these principles and demonstrates it in the quality of professional services that are provided to each of our Clients.**
 - **Dominion is a management owned corporation which has successfully completed more than 2,500 projects in the last two years alone. With extensive hands-on experience in planning, managing, and conducting all phases of site investigation and remediation, Dominion has a 100% success rate for client satisfaction, project completion and regulatory compliance.**
 - **The technical, analytical, and hands-on field experience of our staff, combined with our commitment to client satisfaction, enables Dominion to successfully complete challenging and complex projects in a cost-effective and timely manner. Dominion’s project approach encompasses regulatory compliance while addressing client liability issues. This custom-designed project by project strategy is executed with a practical assessment of project needs along with the use of innovative testing and remediation techniques. Dominion’s project approach is built on the gathering of sound facts, generated through site investigations, client information, regulatory guidelines, and record searches. All applied with years of expertise.**
 - **Many staff members have advanced technical degrees in Environmental or Civil Engineering, Industrial Hygiene, Biology, Microbiology, Mycology, Geology, and Toxicology. Dominion’s asbestos field employees hold AHERA Inspector, AHERA Management Planner, AHERA Project Designer, and AHERA Contractor / Supervisor. They maintain these certifications through EPA approved annual refresher courses. Dominion currently has eight qualified senior staff members, ensuring a quick response to all work requests. Full resumes for key staff members are available upon request.**
 - **Quality service is our goal, so as Dominion’s business continues to grow Dominion will continue to add qualified staff and provide them with the resources necessary to meet the needs of each individual client. Dominion’s outstanding administrative support staff is credited with reducing our report turn-around time, organizing our field employees so that appointments are met on time, and managing project samples with outside laboratories. This assures that all necessary project support data is available to each project manager for efficient project completion.**
 - **Dominion has worked with large and small clients both on the local and national level. Dominion has extensive knowledge, experience, and understanding of the performance standards required by demanding clients regarding project procedures, record-keeping, report writing, and field activities. In summary, Dominion has the trained staff and professional experience to perform professional environmental services on any size project in the United States and Canada**

**RFQ# ADSP014-00003465, Annual Request for Qualifications and Experience
REVISED - Attachment I – General Qualifications**
