

# HP Software Licensing & Management Solutions (SLMS)

## HP License Management Service

Your way to total control of software and hardware assets

## Cut costs, gain control and end license compliance concerns.

HP Software Licensing & Management Solutions will work hand-in-hand with you to streamline every aspect of hardware and software assets licensing and management. As a License Management Service client, you can leverage other HP Software Licensing & Management Solutions, including our comprehensive, truly global software and hardware volume licensing capabilities.

HP Software Licensing & Management Solutions provides you with one prime source for managing the complex cycle of purchasing, implementing, maintaining, upgrading and supporting your IT environment worldwide—enabling you to reduce costs, achieve compliance, improve control and efficiency, and maximize your global resources.

At HP, we are simplifying the complexities of IT management for thousands of companies—whether integrating hardware, licensing software or obtaining services worldwide, you'll receive backing from one of the world's most reputable information technology leaders.

By combining our global hardware and software licensing capabilities with the strength of our License Management Service you can:

- Cut costs
- Gain control
- End license compliance concerns

HP License Management Service collects, analyzes and delivers vital IT asset data to help you fully understand and rigorously manage your software licenses and hardware assets. It helps you reduce the total cost of ownership of IT assets by:

- Identifying underutilized assets that can be reassigned and software licenses and hardware assets that can be reallocated
- Eliminating obsolete service contracts
- Standardizing software and hardware, resulting in lower help desk costs
- Eliminating overbuying of software and hardware

Another smart solution from HP Software Licensing & Management Solutions.

## Have the knowledge and security you need.

With HP License Management Service, you take control of your software and hardware assets. This service provides a comprehensive monthly inventory of the hardware and software installed throughout your enterprise. You manage hardware and software throughout their lifecycle more easily and always have a regularly updated hardware and software inventory database.

HP License Management Service gives you the information you need to increase control and improve service to users by:

- Understanding what you own, where it is and who is using it
- Having the information needed to plan and monitor hardware & software upgrade projects
- Eliminating the use of unauthorized software and hardware
- Understanding the deployment of unique in-house applications
- Exporting IT asset management data to popular decision support and help desk applications

HP's ongoing License Management Service helps you maintain compliance with software vendors by:

- Maintaining an accurate inventory of software installations requiring licenses
- Using a consolidated repository of all software purchases and volume license agreements
- Integrating software and hardware license ownership with software and hardware installation information

### **License Management Service offers you a variety of reports, such as:**

- Summary of hardware and software application licensing
- List of changes to machine hardware specifications
- Summary of contract expiration periods

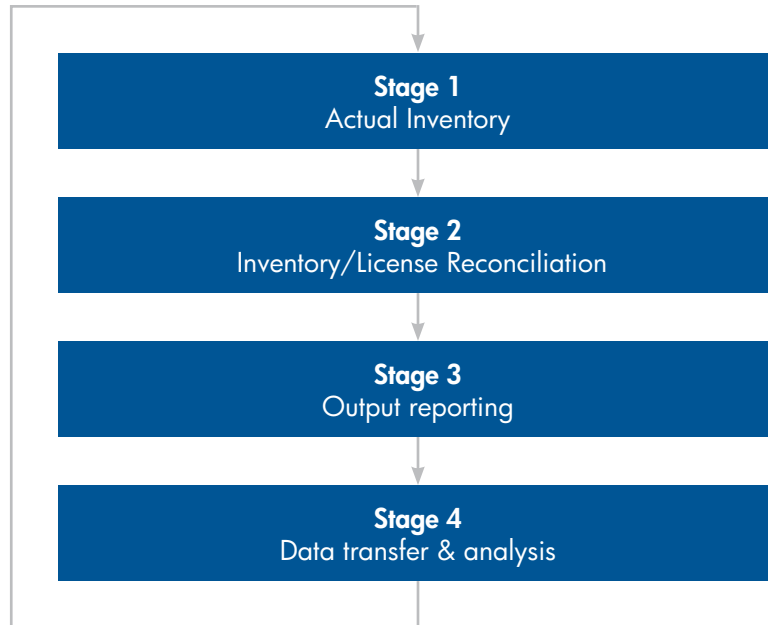

HP's License Management Service offers you the ability to work with your existing infrastructure and processes whenever possible to simplify and reduce the cost of implementation.

License Management Service is a managed service which allows you to effectively monitor and manage your desktop and server software and hardware assets while enabling you to move toward compliance.

## Know your license compliance status.

The first step in providing License Management Service is a detailed, automated inventory across your entire network. The service uses the inventory collection method most appropriate for your IT environment and has gateways to enable most inventory formats to be incorporated as necessary. The inventory process used does not interfere with your systems' functioning and is transparent to the user.

Data obtained provides a complete and in-depth baseline profile. This can include current license compliance status, provided you have supplied your hardware and software purchase history.

By leveraging HP Software Licensing & Management Solutions, you simplify your organization's license purchase history and match it against actual hardware and software installations. You always know precisely what you own, what is being used and what assets can be reassigned.

Monthly inventory collection tracks and reports all changes within your company's IT environment. These reports are made available to you via a secure website.

HP License Management Service eliminates the hassle and complexities of license management. LMS requires minimum input from your IT department and is charged on a simple cost-per-seat basis.
