e. TOTAL COST OF PROJECT

\$7,673,753.00

f. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and length of project)

DEMOLITION OF EXISTING 25 HOMES AND REDESIGN OF COMPLETE NEW SITE GRADING/DRAINAGE TO ACCOMMODATE FOR NEW ENERGY EFFICIENT, LEED BASED DESIGNED HOMES OF LARGER AREA. HOME SF AVERAGE OF 2,650 GSF, ON A 11 ACRE SITE WITH NEW ROADS, LANDSCAPE, RETENTION, BUS ACCESS.

ATTACHMENT I – General Qualifications

ANNUAL REQUEST FOR QUALIFICATIONS AND EXPERIENCE NO:  
ADSP016-00005912

STATE PROCUREMENT OFFICE  
Department of Administration  
100 North 15<sup>th</sup> Avenue, Suite 201  
Phoenix, Arizona 85007

5. EXAMPLE PROJECTS WHICH BEST ILLUSTRATE PROPOSED TEAM'S QUALIFICATIONS FOR THIS CONTRACT

(Present no more than five (5) projects. Complete one Section 5 for each project.)

a. TITLE AND LOCATION (City and State) <b>JORDAN CENTER FOR EARLY EDUCATION</b> CHANDLER ARIZONA	b. YEAR COMPLETED	
	PROFESSIONAL SERVICES 2014	CONSTRUCTION (If applicable) 2015

23. PROJECT OWNER'S INFORMATION

c. PROJECT OWNER MESA PUBLIC SCHOOLS	d. ORIGINAL BUDGET/NTE AMOUNT OF PROJECT \$700,000.00	e. TOTAL COST OF PROJECT \$697,765.00
---	--	--

f. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and length of project)  
57,750 GSF OVERALL RENOVATION OF ALL CLASSROOMS, RESTROOMS, AND OFFICES WITH AN EMPHASIS ON THE COMPLETE REDESIGN OF THE PUBLIC AREAS: ADMINISTRATION, LOBBY, NURSE'S AREA, EVALUATION, RECEPTION AND THE EXTERIORS AND COURTYARD.

ATTACHMENT I – General Qualifications

ANNUAL REQUEST FOR QUALIFICATIONS AND EXPERIENCE NO:

Phoenix, Arizona 85007

6. ADDITIONAL INFORMATION

a. PROVIDE ANY ADDITIONAL INFORMATION YOU FEEL MAY BE NECESSARY TO DESCRIBE YOUR FIRMS QUALIFICATIONS. (ATTACH ADDITIONAL SHEETS AS NEEDED.)

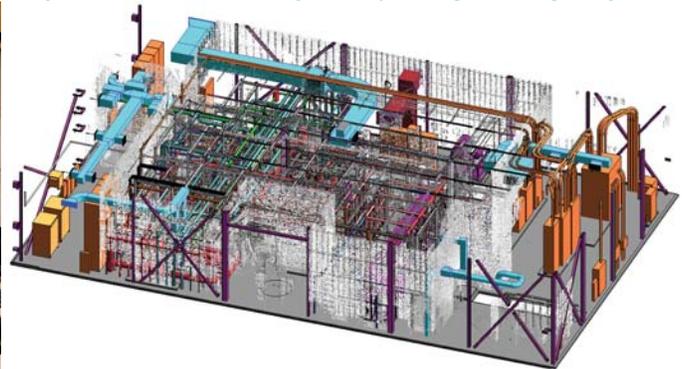

ASSESSMENT, ANALYSIS & EVALUATION

We believe in ‘Smart use of Technology’; during all the stages of our project we rely on the latest technologies available to provide our clients with the most accurate information and solutions, shortening the time of performance as it is reflected in money savings without risking the quality of the final product.

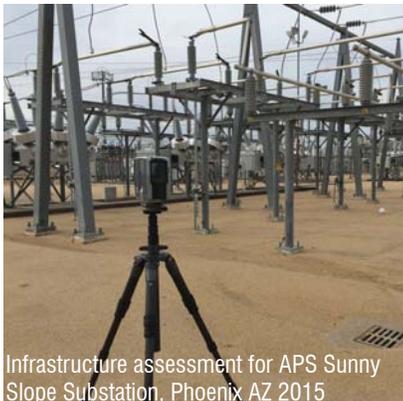

When it comes to current infrastructure - buildings, installations, land, we rely on HD3DS (High Definition 3-D scanning). Our Team **self-performs 3-D Scanning** to record all existing conditions of your buildings or campuses, including all MEP systems. This allows us to easily document and **re-create any building existing into a computer model**. Through this method we can quickly generate a virtual, real-size computer model that can be reviewed at any time without having to spend time in the field revising specific dimensions, elevations, colors, site elements, textures, lighting, HVAC equipment and ducts, etc.

Having the 3D scan available will help understand every single part of your infrastructure for any future planning including all systems.

Identification of Systems inside existing Metal Building Structure through the use of 3-D Scanning and BIM technologies.

Infrastructure assessment for APS Sunny Slope Substation, Phoenix AZ 2015

3D Scan for Building Assessments for Mesa Public Schools Summer of 2015 - 53 Schools.

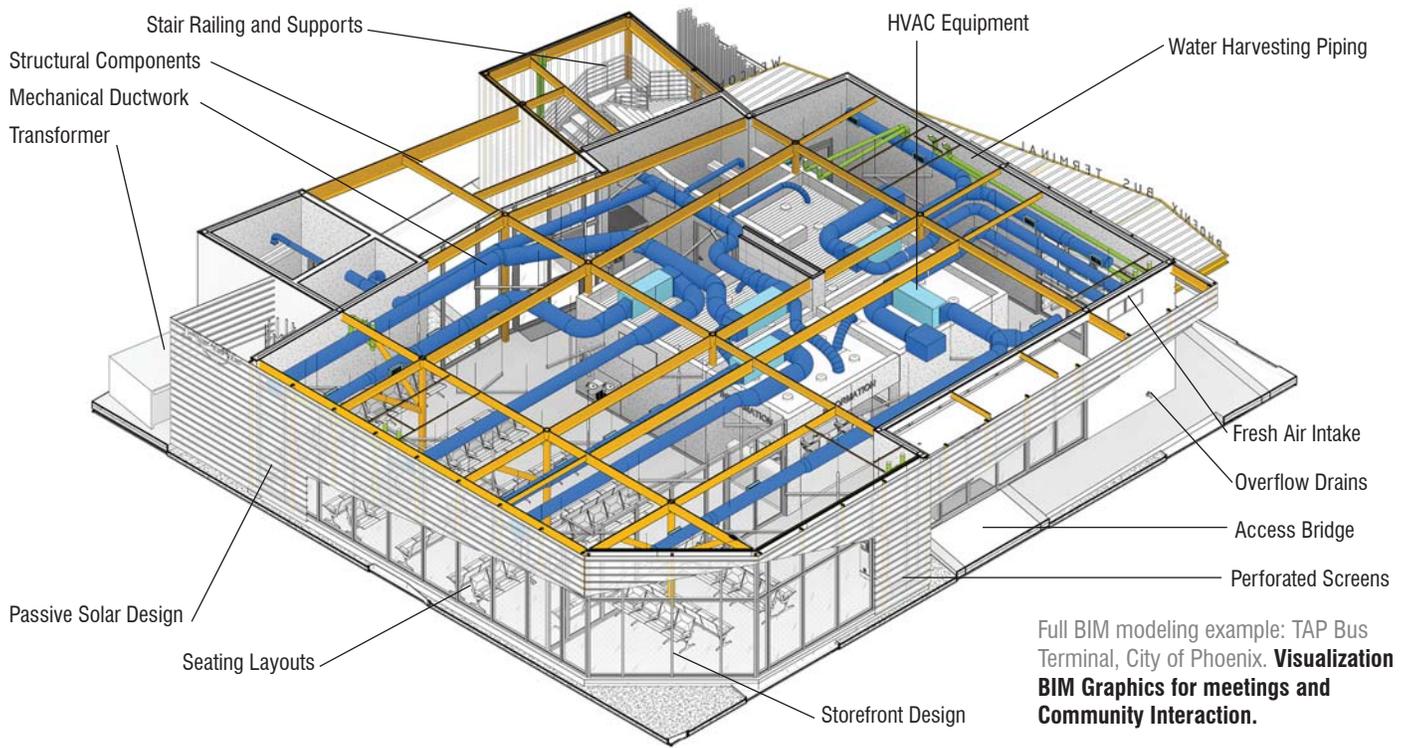

Infrastructure and buildings As-Built Soda Springs Ranch, Camp Verde Arizona 2015

## 6. ADDITIONAL INFORMATION(Continued...)

### REAL BIM (BUILDING INFORMATION MODEL) - REAL DESIGN ANALYSIS

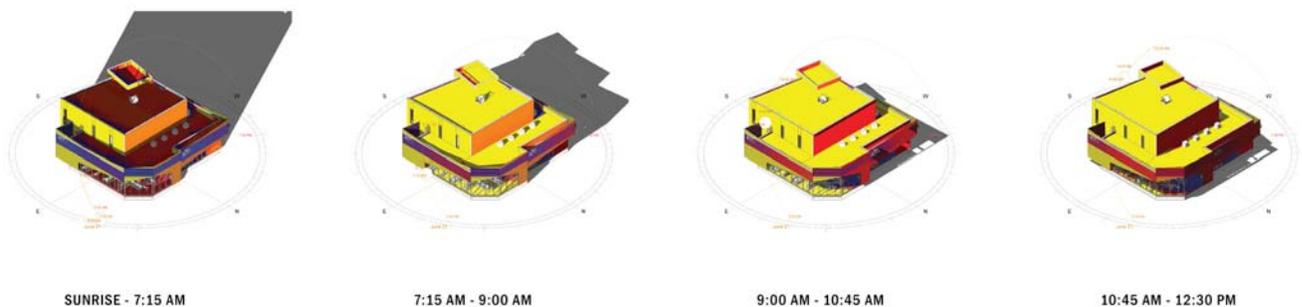

Since 2007, this team has been fully BIM capable: all of our work is performed through BIM which simplifies the decision making process and increases the owner's understanding of the facility, while facilitating more accurate interaction with other disciplines.

With the use of full BIM (full BIM meaning using the software not only to create 3D models, but with complete technical information embeded that your maintenance personnel can access at any item) we can reduce the size of our design team in 60% of any typical firm that still handles BIM drafting on AutoCAD technologies, again representing cost and time advantages to the Owner.

BIM provides availability of an intelligent database of its interiors, exteriors, structure, and systems, that can be used for the new users today and tomorrow as they modify the space. This eliminates the necessity to have to later update building information for other uses such as Energy Management Systems, Security, and future remodel work, if a BIM model is available.

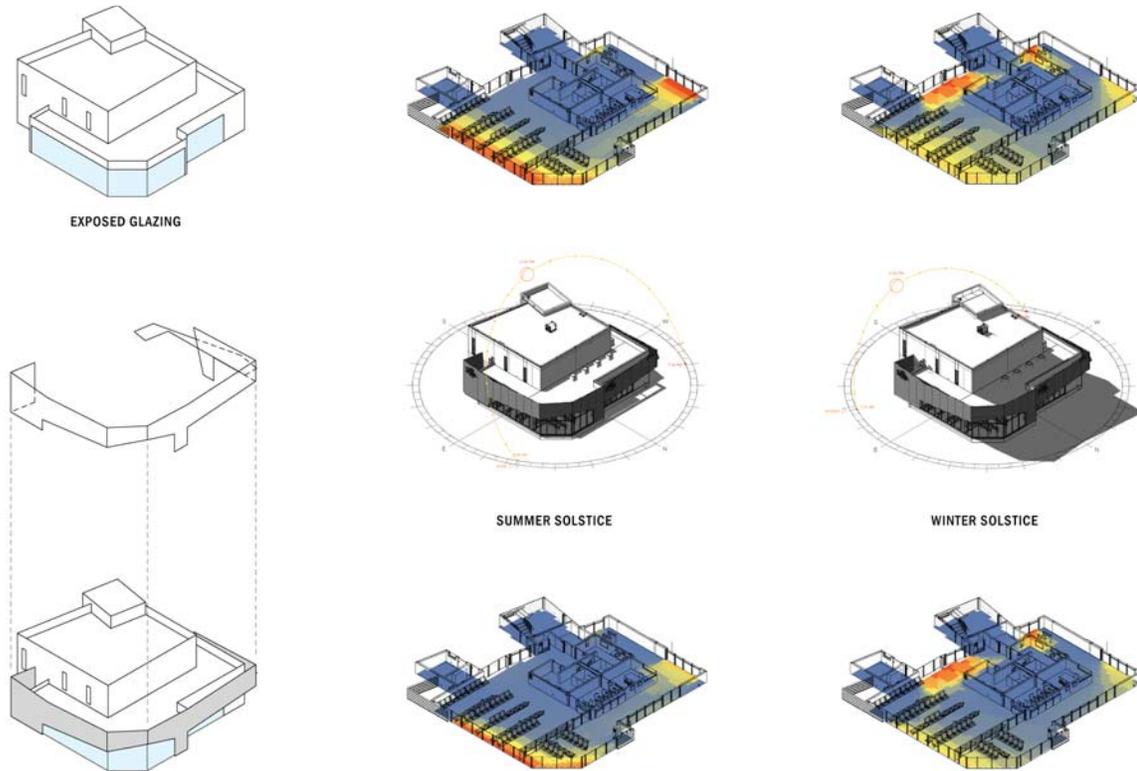

The BIM model is used by our team to determine how the sun exposure will affect the use of energy, by predicting which areas of the building are receiving more or less heat gain by exposure to the sun.

Solar Heat Gain by elements at different time of the day for building shell design purposes.

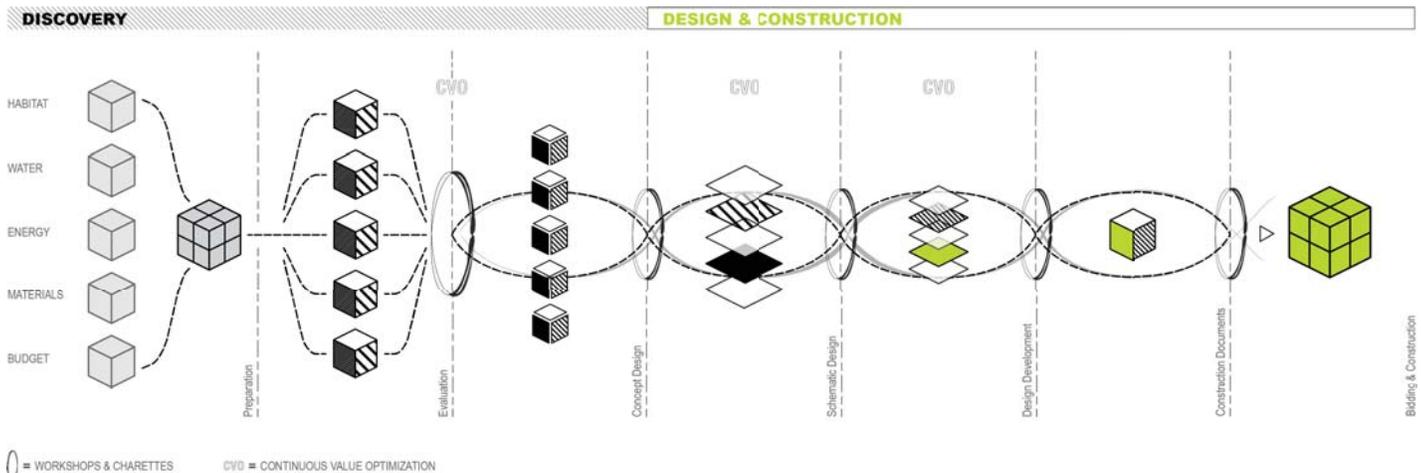

## 6. ADDITIONAL INFORMATION(Continued...)

The other important factor that comes with exposure to sun is the amount of daylight received by the building, the Team then analyses how much natural light needs to be filtrated or blocked to provide the right amount for the specific use of the facility by the use of the same BIM model:

With the use of BIM, we can create ‘through-the-year’ solar radiation exposure diagrams and determine how to control the amount of daylight required for the building. Solar radiation also affects how the building performs energy-wise.

Every project, by nature, requires to have a series of phases in mind with different steps of the process that need to be organized in the best way possible to make sure we don't miss opportunities. For this reason, Merge follows a **client-centric planning and design process** that identifies and responds to every aspect of the proposed project. Our ‘MERGE’ collaborative approach makes everyone at the table an **active and valuable participant in the process**.

## 6. ADDITIONAL INFORMATION(Continued...)

We see this project as a small series of tasks following a well delineated Plan, supported by all the stakeholders of this process. We can manage this sequence through **continuous workshops and design charrettes**, where our team gathers information, test assumptions, develop concepts, refines and details the design to be able to prepare construction documents. With this approach our team **fully dedicates its efforts our clients**.

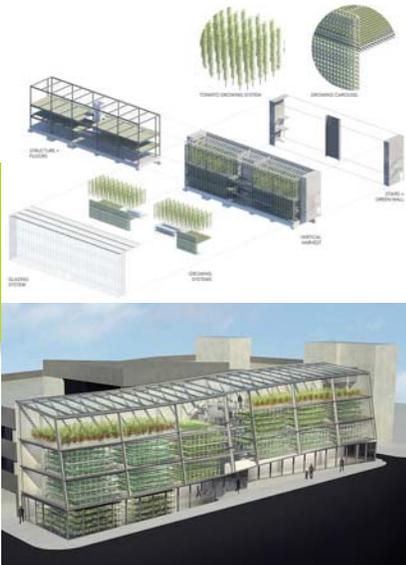

### A TEAM THAT IS ALL ABOUT OPPORTUNITIES...

We are a conscious team of professionals that understands **we are creating 'the future'**, the future of our communities, the future of our children. We cannot afford to miss opportunities as we design new infrastructure, new facilities, new environment; at the same time, we cannot afford to waste our monetary resources without thinking of **the impact of the decisions we make today**. Our team members are LEED accredited and apply their knowledge to every aspect of the design of the site, building and interiors. As advocates of the AIA 2030 design challenge we provide our clients with energy-use data to help them understand how their building will perform now and into the future, **but is not all about adjusting the building to perform better, it's about the opportunities we encounter in the way**.

Merge has taken this '**opportunity approach**' throughout its discovery process to allow all participants to identify possible opportunities, not only for the built-environment, but to understand **how funding, management, community involvement can affect the project under discussion**. This discovery process generally brings the best of our minds and merges into out of the ordinary solutions.

i.e. the opportunity to incorporate an educational program into the building program can represent an advantage to a community in many ways:

Incorporation of Food production system into an educational program

Architectural diagrams showing a building with a vertical food production system. The diagrams include a cross-section of the building showing the food production system integrated into the structure, and a perspective rendering of the building showing the food production system on the exterior. The diagrams are labeled with terms like 'Vertical Farming', 'Food Production System', 'Building', and 'Educational Program'.

### ADVANTAGES

**TO THE PROJECT:**

- Other avenues of funding: USDA, Federal, New Tax Credits, State, Private, Universities, Other Institutions Pro-Farming alternatives.
- Sustainable Facility that can generate extra profits.
- Project takes more exposure, so the program and the organization/school.

**TO THE USERS/STUDENTS:**

- Opportunities of learning by doing.
- Ownership of the facility.
- Interest in being part of the program, recognition.

**TO THE COMMUNITY:**

- Full community involvement.
- Safety as participants take ownership.
- A new way of being self-sustainable.
- An incubator to new economic development in the area.
