- Terrorist Database Searches
- Social Security Match

DCS IT Maintenance and Operations Services

[Contract Owner: Michael Hillebrand](#) email: Michael.Hillebrand@azdoa.gov

CTR062780

INTERNATIONAL BUSINESS MACHINES CORP - IBM

Audra Curry

aacurry@us.ibm.com

Scope: Contract for Maintenance & Operations (M&O) professional services needed to support the AZ DCS Guardian Case Management System and all required services are described in detail in this Scope of Work including transition services, program and project management, managed cloud services, operational support services, routine application support, major enhancements and solution architecture support, business analytics and reporting services support, documentation and training of users for new Guardian enhancements being deployed, and service level management.

AZNet III - Voice, Network and Call Center Communication Services

[Contract Owner: Michael Hillebrand](#) email: Michael.Hillebrand@azdoa.gov

CTR049888

CENTURYLINK COMMUNICATIONS LLC - Lumen Technologies Group

Aimee Hunt

aimee.hunt@lumen.com

Voice and Unified Communications: Contractor will be responsible for the complete design, installation, and/or provisioning of Voice over Internet Protocol (VoIP) capable Voice communications equipment and/or Services, for approximately 40,000 users (including Virtual workers), at facilities located across the state of Arizona. Contractor will also include maintenance, administration, operation and related activities associated with the State's Arizona Network or "AZNet" program. This Scope of Work (SOW) describes the Contract Voice Communications Services to include the current environment of the State, communications assets, the required future State Services, SLRs, implementation timelines and other facts that are essential for Contract performance.

Network, Security and WIFI: Contractor shall be responsible for the operation, transformation, support, and security of the data network for the State of Arizona (Network or AZNet) pursuant to the terms of this Contract. This Network Services Scope of Work (SOW) sets forth the requirements of Contractor for the Network Services to include the current environment of the State, communications assets, the required future State Services, SLRs, implementation timelines and other facts that are essential for Contract performance.

Contact Center: Contractor shall be responsible for the complete design, installation, and/or provisioning of Contact Center equipment and/or services at facilities located across the State of Arizona. Contractor shall also be responsible for the maintenance, administration, operation, and related activities associated with the State's Arizona Network (AZNet Program). This Scope of Work (SOW) describes the Contact Center Services which includes the current environment of the State, communications assets, the required future State Services and various other governing requirements such as Service Level Requirements, implementation timelines and more that are essential for Contract Performance.

Scope of Work:

The Scope for Data, Voice, and Multimedia Network-based, Network-embedded Products and Services under this Contract includes all converged and traditional-separate voice, data, and video network products and services primarily designed, and defined by applicable industry standards, for transporting/receiving data (data, voice, and multimedia) between connection points, destinations or endpoints.

- This Scope does allow for Data, Voice, and Multimedia Network based Network-embedded Products and Services including:

- All labor, materials, transportation, equipment and other activities for, and reasonably incidental to: installation, integration, implementation, engineering analysis, design and configuration, of the manufacturer's product or service.

- Software and/or hardware maintenance and support of the manufacturer's product or service; and

- Ancillary services in conjunction with the implementation, or installation of a manufacturer's product.

- Networking products and services, such as routers, gateways, switches, modems, CSU/DSU, access devices, concentrators, network-embedded security solutions, caching and content management devices;

- Network firewalls, filtering software and security solutions

- Network Management Products such as management, monitoring, testing, analyzing, and traffic simulating equipment;

- Wireless Products for applications such as:

- IEEE802.11X (Wireless Local Area Network - WLAN);

- IEEE 802.15 (Wireless Personal Area Network – WPAN);

- IEEE 802.16 (Wireless Metropolitan Area Network – WMAN); and,

- Fixed Wireless Equipment and related services, such as, access points, transfer points, and controllers

- Telephony to include:

- Telephony products and services, such as IP Telephony systems, PBX and key systems, voice mail and unified messaging systems, teleconferencing, call management systems including Automatic Call Distribution (ACD), Interactive Voice Response (IVR), Computer Telephony Integration (CTI), call account, and the associated end-user telephone devices (other than two-way radios)

- Telephony management, monitoring, testing, analyzing, and traffic-simulating equipment

Cloud Services integration specifically used in conjunction with the hardware equipment and software purchased and utilized within the scope of this contract.

- Managed Services specifically used in conjunction with the hardware equipment and software purchased and utilized within the scope of this contract.

- Services used in conjunction with the design, analysis, configuration, implementation, installation, training, maintenance, and support of Data, Voice, and Multimedia Network-based, Network- embedded products and services.

- State Agencies, boards and commissions must receive approval from ASET-EIC prior to any purchases under Items 2.1.5 and 2.1.6 of the Scope of Work.

- Training:

- Initial Training on specific equipment that has been purchased.

- "As needed" Training on specific equipment that has been purchased (e.g. New Hires, etc.).

- Annual Training for up to fifty (50) participants.

This Scope does not allow:

- The single purchase of products and services primarily designed to store or process (compute) data, such as midrange or mainframe computer systems, or consumer electronic hardware, component parts and accessories;

- Video and Audio conferencing equipment and products; such as:

- Audio and visual presentation and composing equipment;

- Cameras;

- Monitors;

- VCRs and Consumer electronics;

- Building Wiring Systems (BWS) and structured cabling systems;

- Personal Computer Hardware (which includes desktops, laptops and tablets), PC Software and related Services including desktop PC-based firewall and virtual private network (VPN) client-only products and services;

- Fixed Wireless Systems and Related Services such as point-to-point and multi-point radios, cabling antennas, towers, power, frequency coordination, licensing, designed to receive/transmit data;

- General purpose UNIX Workstations & Servers;

- Disaster Recovery Services;

- Value-Added Software not specifically designed to support and secure the transport of data (as defined above);

- Radio related Products and Services, including Public Safety communication Equipment, 2-way radios, 900MHz Digital Radio Systems, and Digital Microwave Radio Equipment;

- Disk Data Storage Hardware, including Network Attached Storage and Storage Area Network;

- Carrier Services, both regulated and unregulated; and,

- General Information Technology Research & Advisory Service and IT Consultant.

NG911 Call Handling Equipment (CHE)

CTR047229	Innovative UAS - Innovative UAS	Ali Ahmed	enterprise@innovativeuas.com
CTR047234	Autonodyne LLC - Autonodyne LLC	Nathan Titus	ntitus@autonodyne.com

Purpose: The State of Arizona is seeking to establish one or more 'statewide' contracts to supply drones, remotely operated devices, and related goods and services for use by the State and its eligible cooperative entities. This contract is intended for the outright purchase of drone systems, and not for as-needed drone operator services.

Background: The State and its eligible cooperative entities have an increasing need to procure and deploy various unmanned devices to facilitate operations in a safe and efficient manner. Missions for these devices include operations in the air, on land, and under water. Examples of practical applications include, but are not limited to: aerial surveillance, aerial mapping, imagery, and land survey, payload delivery and transportation, bomb disposal, hazardous material handling, reconnaissance, threat pacification, search and rescue, and inspection and maintenance.

The State seeks related goods and services necessary to operate these devices in the furtherance of their missions. Examples of related goods and services include, but are not limited to: training, maintenance, parts and accessories, configuration and installation, certification and licensing, software and related software services, and countermeasure systems to aerial, terrestrial, and aquatic devices.

Unmanned Aerial Vehicle (Drone) Services

Contract Owner: Jim Atkins email: james.atkins@azdoa.gov			
ADSP015-097108	Environmental Systems Research Institute Inc	Laura White	Bids@ESRI.com
A geographic information system (GIS) is a system that creates, manages, analyzes, and maps all types of data. GIS connects data to a map, integrating location data (where things are) with all types of descriptive information (what things are like there). This provides a foundation for mapping and analysis that is used in science and almost every industry. GIS helps users understand patterns, relationships, and geographic context. The benefits include improved communication and efficiency as well as better management and decision making.

-----------	---	--------------	--

Category 1- Cellular Wireless Services: This category will cover the basic cellular wireless transport services for voice, data and messaging, as well as any new basic transport services that may be introduced for applications like those defined for Internet of Things (IoT) applications. "Cellular wireless transport" is defined to mean carrier provided wireless services that employ a radio access network based on technologies defined by the Third Generation Partnership Program (3GPP). We are requesting pricing for both traditional cellular plans that include a subsidized mobile device as well as bring your own device (BYOD) plans where the user will supply their own mobile device and require only network service from the carrier.

Category 2- Equipment and Accessories: This category includes any equipment or accessories operating over cellular carrier provided network services or intended for use with cellular connected devices.

Category 3- Turnkey Wireless and IoT Solutions that are offered as a product: This category includes any of the wireless or IoT solutions or applications being offered as a complete product by the cellular wireless carriers or any other Contractor(s).

Contracts to provide provide expertise and consulting 9-1-1 and/or Public Safety Professional Services in the following areas:

- GIS SERVICES
- ADDRESSING SERVICES
- SYSTEM ADMINISITRATION PROJECT MANAGEMENT
- COMPUTER PROGRAM DEVELOPMENT

Scope: To provide expertise and consulting Professional Services to 9-1-1 Public Safety Answering Points (PSAPs) located throughout the State of Arizona and to other Public Safety entities. The Arizona Department of Administration (ADOA) 9-1-1 Office supports approximately 100 Public Safety Answering Points (PSAPs) around Arizona. These PSAPs are responsible for answering and handling 9-1-1 calls placed by the public in need of emergency services. In addition, other Public Safety related entities throughout the State of Arizona periodically have need for Professional Services available through the resultant Contract.
