- Lifetime Warranty

www.iopcusa.com

Dear Prospective Client:

Thank you for considering MultiSort™ Modular Millwork™ for your active workroom interiors!

This new guidebook illustrates modular, flexible furniture units designed to satisfy active work areas across the corporate enterprise. **These specifications supercede and replace all prior specifications and technical details for MultiSort Modular Millwork.**

The first half of this guidebook contains our most popular, preconfigured selections. The selection in the second half of the guidebook allows you to specify virtually any custom solution you desire from the suite of modular components.

Please call our customer service team if you do not see the solution you seek, or if you need expert advice and design assistance. We are always happy to assist you in this manner.

The new standard finishes are listed on pages 6-7. If you desire a custom finish, please call for availability. We are constantly updating our finishes and can usually source your particular requests in short order.

MultiSort™ Modular Millwork™ is offered through our nationwide network of dealers who are factory-trained experts in the field of active workroom organization and efficiency.

Please call for the name of your local representative for assistance with site analysis, design, specification or related support.

Thank you again for considering MultiSort Modular Millwork. We look forward to the opportunity to be of service in supporting your active workroom furniture needs.

Sincerely,

Arne G. Chardukian – President
International Office Products Cooperative

P.S. Please turn the page for a detailed contents listing.

Modular Sorters & Document Organizers

- Openings adjust on 1" increments with fingertip pressure.
- Transparent trays and backs reduce eyestrain by using available light to improve visibility and sort efficiency.
- Transparent trays and backs are standard components – specify other if desired.
- Standard slot height is 3 1/4" per opening.
- Add trays and shelves to increase slot capacity (see Page 40).

PLEASE CALL FOR SPECIAL REQUIREMENTS.

Lifetime Warranty

International Office Products Cooperative (IOPC) warrants that all MultiSort™ Modular Millwork™ (herein after referred to as “MultiSort products”) shall be free from defect in material and workmanship for the duration of use and ownership by the original retail purchaser.

The warranty is applicable exclusively to original purchasers of MultiSort products accomplished through factory authorized retail dealers of IOPC, and shall remain in force for so long as the product is used in conformance with the original intended purposes and activity as represented to the authorized IOPC retail dealer or representative.

Should such warrantable conditions arise with respect to MultiSort products, IOPC will repair or replace such damaged or defective products free of charge, at its discretion, and shall pay reasonable shipment and replacement costs to accomplish such repair or replacement.

Normal wear and tear is not a warrantable condition.

Unauthorized uses, repairs, installation or modifications of MultiSort products shall void this warranty and any liability for warrantable repairs or replacement by IOPC. Misuse, neglect, abuse or accidents resulting in damage to MultiSort products are non-warrantable conditions and shall release IOPC from any liability of repair or replacement of damaged MultiSort products where damage results from such non-warrantable conditions. Damage in transit to original purchaser is not a warrantable item, as such damage is the responsibility of respective motor carrier and shall be resolved by the respective authorized IOPC dealer providing goods on behalf of the original purchaser of MultiSort products.

This warranty is the exclusive and only warranty made by IOPC pertaining to MultiSort products. Any additional warranty, whether expressed, implied, or otherwise construed, is summarily hereby disclaimed.

Furthermore, the herein above stated remedies for claims arising from warrantable conditions with regard to MultiSort products are the exclusive, sole remedy for any breach of warranty. In no event nor under any circumstance shall IOPC be liable for any incidental or consequential damages of any kind arising from the warrantable purchase and use of MultiSort products.

FloorSaver Tables are 15 3/4" Deep x 29 3/4" High. Available in Same Widths as Workstation Tables Above.

Modular Millwork Specifications

A. WALL HUNG CABINETS (MODULAR, DEMOUNTABLE SYSTEM):

1. SIZES:

Standard wall cabinets to be available in 24", 30", and 36" widths by 30" high (15 3/4" deep with door).

2. CONSTRUCTION:

Wall cabinet body, doors and shelves to be constructed of minimum 3/4" thickness, 45-65 psi industrial particleboard substrates that meet or exceed ANSI standard A.208 1-1999 for strength, thickness and surface smoothness. Cabinet back to be integral, single panel MDF substrate of 45 psi density, minimum 1/4 inch thickness.

Door edging to be of solid 3mm thickness PVC, thermally pressure-bonded to all door edges. Cabinet body and interior shelves to have solid 1 mm thickness PVC, thermally bonded to all exposed edges.

Door hinge system to be concealed, self-closing 35 mm "cup-style" with nickel plated clip-on/off, 6 way adjustable hinges (Blum Inserta Hinge/Clip Series 71T559/173L8100 or equal). Door pulls to be black aluminum, 96mm diameter, ADA approved wire pulls or equal.

Cabinet body assembly to be accomplished via interlocking point-to-point cam fastening system (Haeefe Element/Cam Series 262.27.921/262.26.826 or equal), permitting easy change of body components "on demand". Cabinets shipped **ASSEMBLED** for easy field install. Cabinet construction to include integral, fully plowed one-piece back for maximum cabinet strength and squareness under fully loaded condition.

Wall anchoring to be achieved via integral anchoring brackets, factory installed in upper interior cabinet rear corners. Anchoring brackets to feature vertical leveling system (1" range) with locking brackets (Blum Series 48N0510 or equal) to attach cabinet body to wall mounted Zip-Rail System (Haeefe Series 290.11.900 or equal) attached to wall studs. Cabinet construction to include dual rear anchoring cross members (full width, 3/4" thickness by 3 1/2" height) to enable additional cabinet anchoring members for maximum load and/or seismic requirements.

Wall Cabinet load rating to be 175 lbs. maximum per cabinet based on standard attachment and anchoring method. For additional load bearing capability, install additional anchoring hardware as appropriate for wall and load into dual anchoring cross members in cabinet rear.

3. FINISHES:

Cabinet body, door and shelf finishes to be dual-sided thermoset laminates conforming to ANSI A.208 1-1999 and NEMA LD2 1991 GP2B performance standards. Finishes selection to include standard range of solids, woodgrains, textures and abstracts.

4. WALL CABINET ACCESSORIES:

Standard wall cabinet accessories to include adjustable shelves (3/4" thickness, dual-sided finish with 1mm solid PVC edges), shelf locking cams (to prevent accidental "tip-out") and steel support pins (adjustable on 1 1/4" levels). Wire management accessories to include access grommets (1 3/4" & 3" diameters), wire management J-channels and clips, cable baskets (pop-up style), 6-plug fused and switched power points (UL Listed) for 3 prong grounded electrical and surface mount task lighting.

B. BASE CABINETS (FLOOR STANDING):

1. SIZES:

Modular base cabinets to be available in depths of 15 3/4, 24 and 30 inches. Cabinet widths to be available in 2, 3, 4, 5, and 6 feet (nominal widths) with standard cabinet heights of 30, 36, and 42 inches high.

2. CONSTRUCTION:

Base Cabinet Frame Construction to be free-standing structural design to allow easy placement, leveling and relocation of base cabinets on demand. Freestanding structural frame shall be designed to support 1000 lbs. dynamic load. Vertical frame members to be of 12 gauge furniture steel. Horizontal frame members to be 16 gauge furniture steel (minimum). Frame connection joints to be via flush-mount 3/8" diameter, machine hardened flathead bolts (2" length) inserted through chamfered seats in end frame members (12 gauge) into a 1" diameter by 3/4" long threaded steel "boss" (welded in ends of horizontal frame members). Vertical frame members to have 1 1/4" diameter by 1" long threaded steel "boss" in bases to receive 3/8" diameter threaded steel shaft (1 1/4" length) with non-marring 1 1/4" plastic glide to allow easy leveling of frames/cabinets on installation and relocation. All frame welds to be concealed, full penetration welds for maximum frame strength and to provide a smooth furniture quality exterior finish. All frame members to be powder coat paint finished - charcoal black (unless specified otherwise). Cabinet frames to be precision machined to accept a suite of modular components (shelves, sides, drawers, doors, backs, files, etc.) on original factory assembly or in field at subsequent date as desired. All frames to have "mobile ready" capability to accept standard or heavy duty casters (furniture or industrial) for easy conversion of base cabinets to mobile cabinets as needed.

Modular Millwork Specifications

Base Cabinets: Wood Components forming exterior surfaces and accessories to be manufactured of 3/4" thickness, 45-65 psi industrial particleboard substrates that meet or exceed ANSI standard A.208 1-1999 for strength, thickness, and surface smoothness. All wood components to have dual-sided, thermoset laminate finish (no exposed phenolic backer sheets or raw wood surfaces). All exposed wood edges to have thermally pressure bonded, solid 3mm thickness PVC (high impact rated). Surface and edge finishes and color as specified.

Base Cabinets, Drawer Stack Modules and Hinged Door Sets to be available in 24" and 36" width (nominal) inserts which can be installed as original components or added/removed at a later date in field should user needs necessitate said equipment changes. Drawer glides to be dual offset roller design movement with a minimum 75 lb. load rating per drawer (300 lb. per 4 drawer module). Drawer movement to be self-closing, non-drift design (Blum Metabox Box/File Series 320M5000C15/330H500PC15 or equal). Drawer fronts to be detachable/changeable hardware design with 6-way adjustment for achievement of consistent horizontal and vertical reveals. Drawer sides to be epoxy painted stamped steel panels with full-length bottom support angle for maximum durability, load bearing and service life. Drawer bottoms to be of 3/4" thickness, 45-65 psi industrial particleboard with dual sided thermoset laminate finish (white). Drawer fronts to be easily adjusted or changed as desired, with high impact, chip resistant 3 mm solid PVC edges. Hinged door panels to feature 120° opening, 6 way adjustable, clip on/off concealed hinge system (Blum Series ZSF1300R & ZSF1300L or equal). Door panels to be of 3/4" thickness 45-65 psi industrial particle board with dual-sided thermoset laminate finish and solid 3 mm thickness PVC on all edges. Colors as specified.

Base Cabinet Sliding Door Assemblies to contain roller bearing movements (2 per door panel) with height adjustable positive flange guidance in recess mounted PVC tracks for easy door movement (friction door movement not acceptable). Sliding door assembly to be quick-release style to allow easy removal/insertion of doors as required. Door pulls to be black, 96 mm diameter wire pulls (ADA Approved).

Optional lock sets as specified to be available for all drawer, hinged and sliding door components for base cabinet range.

Standard wire/power management accessories available as specified to include task lighting, access grommets, power points, cable channels, wire baskets and keyboard slides.

C. WORKSTATION TABLES (HEIGHT ADJUSTABLE):

1. SIZES:

Workstation tables to be available in 15 3/4", 24", 30" and 46 3/4" standard depths, with standard widths of 2, 3, 4, 5, and 6 feet (nominal widths). Workstation tables to feature **height adjustability from 26" to 36"** height via telescoping legs inside vertical frame members. Leg height setting achieved via machine hardened 3/8" diameter, 3/4" long allen bolt inserted through frame leg into threaded, telescoping leg member inside vertical frame member.

2. CONSTRUCTION:

Same as Base Cabinet Construction (see B.2).

D. SMART-TOP WORKTABLES (PULL OUT MODULES):

1. SIZES:

Integral workshelf module insert available in 2, 3, 4, 5 and 6 feet nominal widths to provide "on-demand" work surface that retracts in module to conserve floor space when not needed. Smart Top worktable is 15 3/4" deep by 4 1/8" high with interior workshelf extension of 14 1/2".

2. CONSTRUCTION:

Workshelf module constructed of 45-65 psi industrial particleboard with dual-sided thermoset laminate finishes. Exposed edges of module formed of solid 1mm thickness PVC, color as specified. Dual roller extension glides formed of epoxy coated stamped steel runners (Blum Series 430E3500V or equal) with self-closing, non-drift movement. Drawer pull to be recessed mount PVC hardware. Shelf load-bearing capacity rated at 65 lbs. maximum.

E. MODULAR SORTERS/ORGANIZERS:

1. SIZES:

Organizer system to be a modular design to allow unit configuration in any width/height achievable by combining interlocking bins. Individual bin dimensions of 11 3/4" wide x 15 3/4" deep x 14" high (nominal). Overall system to be easily reconfigured "on-demand" by users (with no tools required) to reflect ongoing space and system capacity changes.

Modular Millwork Specifications

2. CONSTRUCTION:

System to be manufactured of **lightweight, high-strength polystyrene** (or equal) that is 100% recyclable, inert material with no pH value and zero emissive properties. Polystyrene is a non-combustible and non-toxic material rated as safe for human contact and food storage applications. Standard body colors are designer gray or black, or other as specified. System modules to contain **integral base mounting plates** for easy attachment to any surface via concealed anchoring plates. System backs to be a modular component that allows user to install open and/or closed backs selectively throughout system as needed. Solid/closed backs available in gray or transparent color, and are field installable and removable "on-demand" with no tools required.

3. INTERIOR COMPONENTS:

Interior system components to include snap-in vertical dividers, lateral hanging files, locking and magnetic closure doors (in 16 colors), drawers (in 3 depth capacities and 6 colors), dished sort trays (in 10 colors - 6 transparent & 4 solid) and reversible flat shelves (with thumb-cut or straight edge - in 4 colors). Interchangeable components allow user to switch back and forth between components as often as desired to support continuous work changes "on-demand" with no tools required to accomplish said changes. Components lock in system bins, and are adjustable on 1" levels with fingertip pressure (even when fully loaded). Accessories to be easily interchanged and utilized in any combination format as specified by user.

4. INDEXING:

All sorter/organizer components to have **pre-molded index slots** to accept clear index holders in standard widths of 3" and 10 1/2" wide by 3/8" or 1/2" heights. Index lenses to be of clear plastic material and are to snap into pre-molded slots in components with no glue or adhesives required. Lenses to accept slide in index strips of corresponding lengths and height. Index strips to be provided in laser printable sheets of 10 distinct colors for effective color coding and indexing of sorter/organizer positions. Sorters/Organizers **Shipped Assembled** for easy set-up and immediate use on receipt and placement.

F. CABINET/WORKTABLE RISERS:

1. SIZES:

Risers to be available in standard heights of 13 5/8" and 27 3/8" high, and in widths of 2', 3', 4', 5' and 6' (nominal widths). Riser depths are 15 3/4".

2. CONSTRUCTION:

Risers constructed of 3/4" thickness, 45-65 psi industrial particleboard with thermally fused dual-sided finish (as specified) on all surfaces. Edge treatment to be solid, 1mm thickness PVC on all exposed edges. Riser seams/joints to be connected via concealed hardware. Riser tops to contain base mounting plates to accept modular sorters/organizers if so specified. 3" wire access grommets in lower left corner of riser is standard placement (specify otherwise if desired).

3. ACCESSORIES:

Riser accessories to include "Forbo" cork tackboards in inside rear wall and wire management and task lighting options as appropriate from manufacturer's standard accessory range. Risers to contain standard surface mounting hardware for easy, secure attachment to all work surfaces.

G. WARRANTY:

Modular Millwork to be covered by manufacturer's **LIFETIME WARRANTY**. Please submit written warranty with all offers or bids.

H. GENERAL NOTES:

1. Responding bidders must provide appropriate literature and/or product samples to confirm compliance with specifications as noted herein.
2. Deviations from equipment as specified must be noted in writing per each individual deviation. Responding prospective supplier will be required to provide actual samples of any offered equipment not in full compliance with project specifications.
3. A written copy of the equipment manufacturer's **WARRANTY** must be supplied with all proposals.
4. Specified equipment characteristics are to be construed as the minimum acceptable quality and performance requirement. If a spec deviation is noted, prospective vendor must provide written documentation of the non-conforming equipment's features that are equal to or in excess of specified minimum quality and functionality levels.
5. Prospective vendors are required to comply with all applicable local fire, ADA, safety, and related relevant codes as pertain in the locality of installation.
6. Prospective vendors must perform and satisfy all facets of project as specified in conformance with all applicable trade associations serving project venue.

MultiSort™ Modular Millwork™ is ...

Ergonomic & Flexible—Easy to Use & Easy to Change!

Multiple door colors, sizes & styles.

Slide-in indexes in 11 colors for easy, complete labeling.

Easily adjust trays on 1" increments – even when fully loaded.

Modular backs in solid, transparent or open. Easy to change whenever needed.

Variety of drawer sizes and colors with optional locks for neat, secure storage of supplies.

Specify Paper slots for recycling, shredding or security.

System Shelf has Flat Edge or Thumb-cut (Reversible) with Snap-in Dividers.

Mobile Work Tables easily adjust from 26" to 36" high.

Lateral hanging files for easy forms and literature staging - simply snap in where needed.

MultiSort is Backed by a Lifetime Warranty

www.iopcusa.com

MultiSort™ Modular Millwork™

- Wide selection of finishes, sizes and interiors. Shipped assembled.
- Finish projects faster without the delays common to site built interiors.
- 7 year depreciable life versus 30+ years for conventional millwork.
- MultiSort is modular and portable – easy to change and relocate.
- Lifetime Warranty.
