24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT *(Include scope, size, and cost)*

WestLand provided infrastructure design for the Monument Valley Tribal Park which included hotel, restaurant, gift shop, administration complex, maintenance complex, entrance facility and employee housing. The infrastructure improvements included approximately 11 miles of water line and three miles of sewer line and associated conveyance systems such as booster systems, storage reservoirs and treatment facilities. WestLand Resources Inc was not only in charge of the design of these facilities but oversaw the construction management and quality assurance during the project development. During the design phase, WestLand coordinated all sub-consultants such as geotechnical engineers and surveyors and coordinated permit applications with multiple regulatory agencies. During the construction phase WestLand oversaw the Quality Assurance, verified project progression, managed contractor draws and assured budget compliance. WestLand has a Certified Erosion and Sediment Control Professional and an ADOT Erosion Control Coordinator on staff. WestLand developed and implemented the Storm Water Pollution Prevention Plan and associated Erosion and Sediment Control Plan including the submittal and acquisition of the Notice of Intent under the US EPA's General Construction Permit.

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT *(Include scope, size, and cost)*

Provided plan review and construction quality assurance for the water and wastewater infrastructure for the Twin Arrows Resort and Casino. The design/build project included all water and wastewater infrastructure. The water system included the construction and coordination of on-site wells, water conveyance, storage; and booster facilities. The wastewater system included gravity conveyance lines, lift station; force main and a 125,000 gpd wastewater treatment facility. Assured construction plans met regulatory and utility company requirements as well as constructability assurance. Managed all QA/QC construction oversight and participated in field modifications and system improvements. WestLand was contracted directly through the Navajo Nation Tribal Utility Authority (NTUA) and represented the NTUA for correspondence and coordination with the casino owner, regulatory agencies and the design build team.

6. ADDITIONAL INFORMATION

a. **PROVIDE ANY ADDITIONAL INFORMATION YOU FEEL MAY BE NECESSARY TO DESCRIBE YOUR FIRMS QUALIFICATIONS. (ATTACH ADDITIONAL SHEETS AS NEEDED.)**

Since our establishment in 1997 in Tucson, WestLand Resources, Inc. has brought together a team of experts in environmental planning and permitting, cultural resources, civil engineering, and landscape architecture. We provide technical consulting services throughout the southwestern United States. Our staff's combined years of experience in a wide range of disciplines makes it possible for us to provide an integrated approach to projects, providing clients with a cohesive platform for success. WestLand's integrated service structure positions us to deliver creative, functional, seamless solutions to a broad range of engineering and environmental needs in both the public and private sectors.

Environmental services offered by the firm include: natural resources planning and management; ecological resources survey and baseline studies; natural resources mitigation design and planning, compliance support and review under the National Environmental Policy Act (NEPA); Clean Water Act (CWA) permitting and compliance support services; Aquifer Protection Permitting support; National Historic Preservation Act Section 106 compliance support; Endangered Species Act compliance surveys and permitting (including the Mexican spotted owl, southwestern willow flycatcher, and Pima pineapple cactus); Certificates of Environmental Compatibility, and Endangered Species Act compliance surveys and permitting; and development of Stormwater Pollution Prevention Plans under the National Pollutant Discharge Elimination System.

WestLand's team of archaeologists provides consulting services for cultural resource management; our specialists conduct archaeological surveys (Class I through III), cultural resource evaluations, monitoring, archaeological testing, and data recovery for a variety of clients throughout the Southwest. WestLand has the experienced staff, equipment, data management systems, and financial resources to complete any sized project awarded under this contract. WestLand's Cultural Resources Division presently employs 18 archaeologists, 15 of which work out of the Tucson Office. The staff includes a Division Director, three Principal Investigators, five Field Directors, a Laboratory Director, three crew chiefs, and five lab/field technicians. One of the Principal Investigators and one Field Director specialize in historic archaeology and archival research, one Principal Investigator is an expert in ceramic analysis and archeomagnetic dating, and another is a noted lithic analyst. The Cultural Resources Division is supported by a large GIS/CAD department, two technical editors, and an administrative staff of accountants who work with the Division Director to ensure that projects remain on budget

WestLand's Engineering Group was founded in 1997 to provide specialized services in water and wastewater engineering. Over the years, we have continued to expand our expertise and available services in the engineering industry, to include development engineering and surveying services. We have developed a talented staff of professional engineers, scientists, and designers for water, wastewater, process and related systems, as well as commercial, residential, and public improvement design and processing. WestLand provides value to our clients through our depth of experience, respect among regulators and peers, and enthusiasm for the work.

Over the last 16 years, we have achieved a current staff level of approximately 120 employees and have added offices in Phoenix and Flagstaff. WestLand's success is attributed to our commitment to quality assurance and quality control which results in an impressive track record for repeat clients. Our work is based on sound scientific principles and our work, like our staff, is characterized by scientific integrity and exacting attention to quality and service. It is this commitment to excellence that enables us to contribute to the overall success of so many projects.

7. ANNUAL AVERAGE PROFESSIONAL SERVICES REVENUES OF FIRM FOR LAST 3 YEARS

a.	Percentage of Total Work Attributable to State, Federal and Municipal Government Work:	36%
b.	Percentage of Total Work Attributable to Non-Government Work:	64%

8. AUTHORIZED REPRESENTATIVE. The foregoing is a statement of facts.
