### ProcureAZ Alert

**Date:** February 19, 2014

**To:** Agency CPOs, ProcureAZ Technical Leads and User Group Members

**From:** ProcureAZ Help Desk

**Re:** Version 11 Upgrade Issues

Periscope has a solution for the XML errors everyone has been encountering. The fix is being deployed ASAP and the Help Desk will send out an alert when they are finished. The vendor quote access problem has been identified as a permission issue and they are working on the fix for that as well.

The Help Desk will send out another update as more information becomes available.
