**Subject:** ProcureAZ Alert: Issue with 4-17 Batch Header Count in AFIS and ProcureAZ - Action Required

## ProcureAZ Alert

**Date:** April 20, 2015

**To:** Agency Chief Procurement Officers, Technical and Leads and User Group Members

**From:** ProcureAZ Help Desk

**Re:** Issue with **4-17** Batch Header Count in AFIS and ProcureAZ – **Action Required**

**From GAO –**

The April 17<sup>th</sup>, 2015 invoice file from ProcureAZ did come to AFIS successfully, but all batches are on hold status because they are out of balance. The total batch header count does not equal to the total individual transaction count. Each agency will need to recompute their batch and then have it released for claims to process tonight. We are working with Periscope to see why this happened.

The previous ProcureAZ Alert dealt with April 16<sup>th</sup> Batch, this is the same issue for a new day.
