Re: Brady's G2B Punch-out not working correctly

We have notified Brady of an issue where the G2B site will launch but there are no products for the State of AZ account. They are looking into the issue, but we do not have an ETA for a resolution.

Beyond Technologies G2B website is generating an error when trying to launch I have notified them of the issue. We do not have an ETA for a resolution.

If you need to place an order with Brady or Beyond Technology TODAY we recommend using a Direct Release Requisition until notified the punch-out websites has been corrected.

Thank you.
