

## ProcureAz Alert

**Date:** July 22, 2016

**To:** SPO, CPOs, and Technical Leads

**From:** ProcureAZ Help Desk

**Re:** Unable to Submit Revision Quotes in ProcureAZ

---

Currently there is an issue preventing **REVISION QUOTES** from completing the submission process in ProcureAZ. Vendors are able to open and edit their revision quotes. Vendors get to the point of clicking the Submit Quote button, after confirming the submission with a final OK button, ProcureAZ will hang and does not process the quote.

The issue has been escalated to Periscope who is currently looking into the matter.

If you have an open revision, please keep it open until you hear from the Helpdesk again. As long as the vendor started the quote before the indicated deadline, ProcureAZ will accept the quote submission, so long as you don't close the revision process.

We sincerely apologize for the inconvenience.

Please contact the Help Desk with any questions or concerns.

Thank you.
