SPO ALERT

Date: May 27, 2010
To: CPO Council
From: State Procurement Office
Re: AD040505 - Multi-Channel Recording Systems and Service

Following a Focus Group on April 28, 2010, the State Procurement Office (SPO) has recommended the extension of all three (3) contracts in Contract Set No. AD040505 - Multi-Channel Recording Systems and Service through December 31, 2010. However, SPO recommends that there be no further extension of those contracts beyond December 31, 2010.

The extension is intended to provide users with sufficient time to transition to alternative procurement(s) and, thereby, satisfy any products' and/or services' needs that may have been previously acquired under those contracts. Please plan accordingly.

Of note, the April 28, 2010 Focus Group was attended by only one State agency. However, no Purchasing Cooperative members attended. Additionally, request for reply to the SPO Alert calling for the Focus Group was extremely limited.

The three (3) contracts in Contract Set No. AD040505 are: Durham Communications, Inc. (AD040505-A4-2-A8); Goeserco, Inc. (AD040505-A4-1-A9); and Stancil Corporation (AD040505-A4-3-A7).

Previously, it was noted in that SPO Alert that the estimated usage across all three (3) AD040505 contracts averages to approximately \$100,000.00/year. The majority of that usage has been from Purchasing Cooperative members' transactions.

Thank you.
